

`SELECT * FROM employees WHERE FIRST_NAME BETWEEN 'a' AND 'c';`

➔ It means from 'a' to 'c' only, including 'c' itself, but it does not mean 'all words that begin with c'.

- If table contain

ahmed

ali

bob

cima

c

Bassam

The output will be

ahmed

ali

bob

c

Because

- ahmed is greater than or equal to 'a'
- ali is greater than or equal to 'a'
- bob is between 'a' and 'c'
- c is between 'a' and 'c'
- cima starts with c, but it is greater than plain 'c'
- Bassam starts with uppercase B, while your range uses lowercase: 'a' and 'c'
